RELEAF PAPER

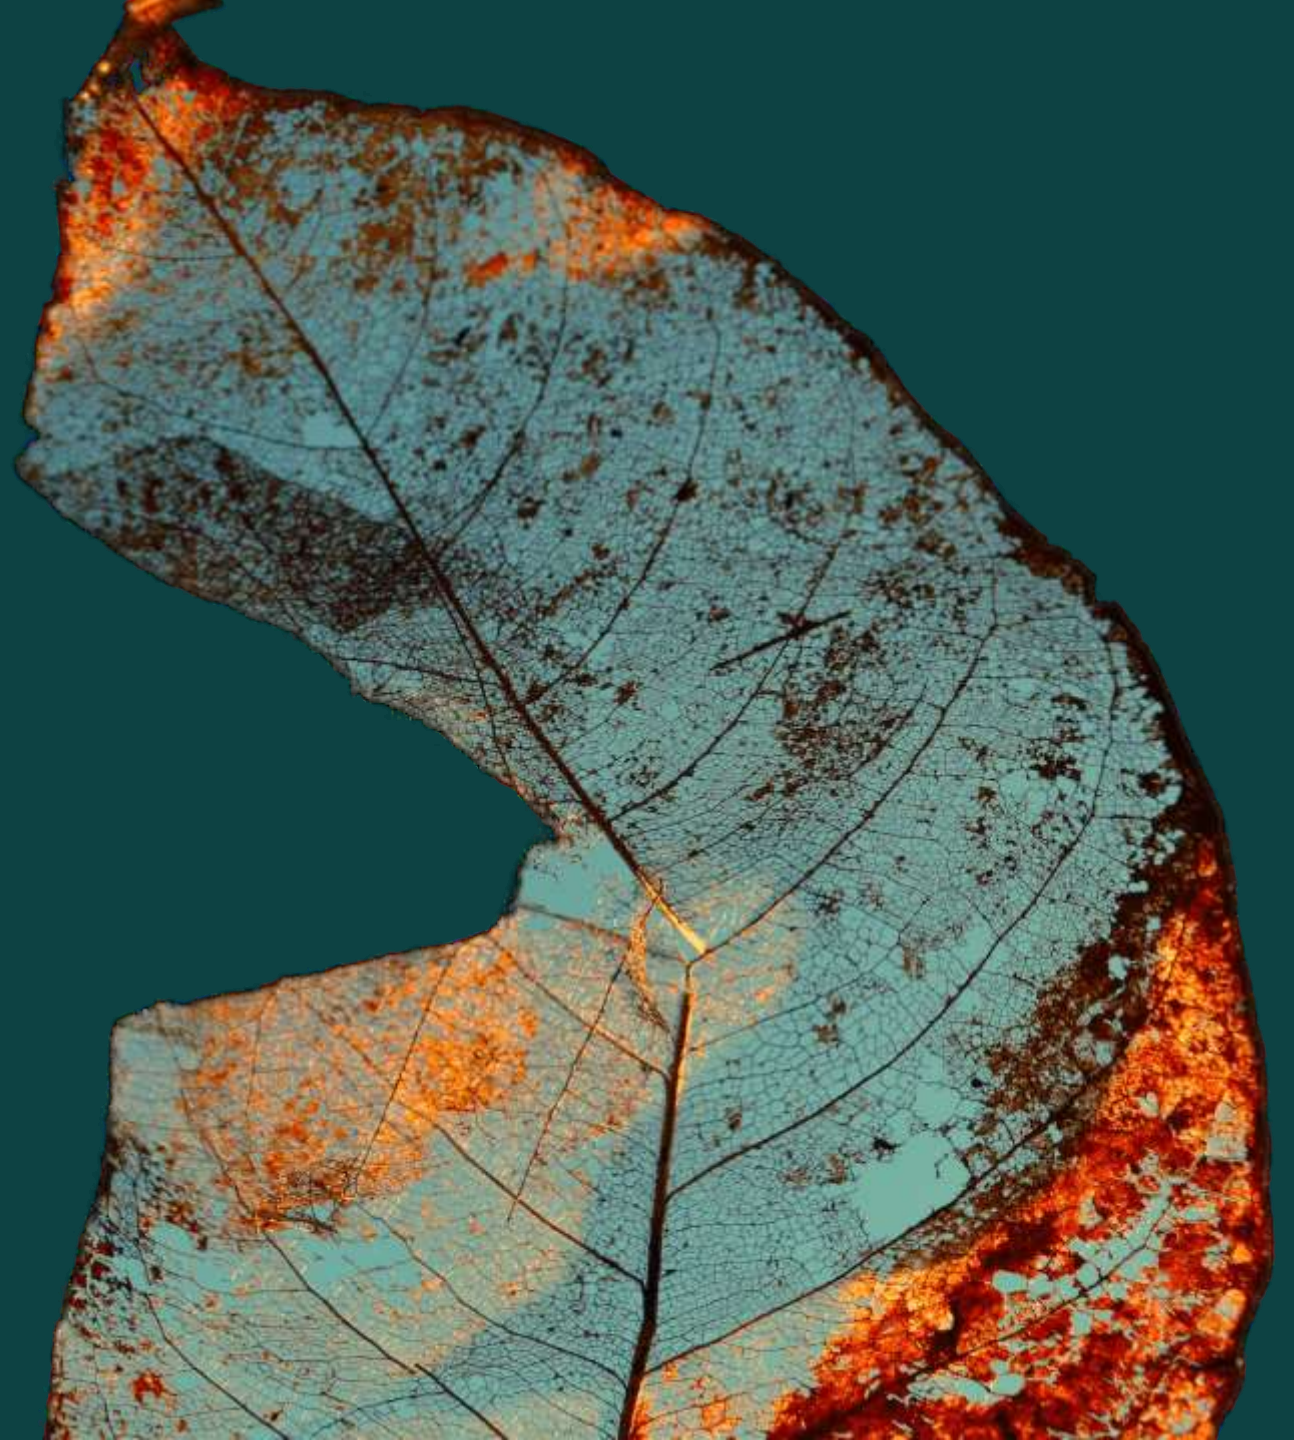

COMPANY INTRODUCTION

THE WORLD'S FIRST PAPER MADE OF FALLEN LEAVES

We recycle green wastes gathered by the cities to eco material for packaging production.

Preventing deforestation & reducing carbon footprint.

RETHINKING LEAVES

Leaves in cities are biological wastes that need to be safely disposed of. Burning leaves catastrophically damages the ratio of nitrogen and oxygen: air becomes polluted by emissions of carbon monoxide that harm nature, animals and people.

We are not only disposing waste but process it in incredibly sustainable paper and material for packaging manufacturing.

material

HOW DOES IT WORK?

1.

**GET GREEN
WASTES FROM
CITIES**

2.

**CLEANING,
WASHING, DRYING,
GRANULATION**

3.

**TREATMENT:
PRODUCTION OF
PULP OR FILLER**

4.

**PAPER AND
FINISHED
PACKAGING**

Releaf Paper is Ukrainian-French startup founded in 2021.

OUR MISSION:

**MANUFACTURING OF SUSTAINABLE
PAPER FROM GREEN WASTES
WITHOUT HARMING THE
ENVIRONMENT**

OUR PRODUCTS

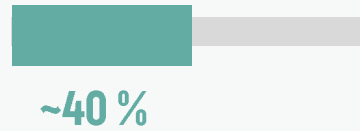

RELEAF PAPER KRAFT

Our key product within industrial line is kraft paper supplied in reels. With a current density range of **60-110 gsm**, Releaf Paper could be used for several applications:

-  Paper Bags
-  Corrugated boards & boxes
-  Wrapping paper
-  Disposable tableware
